## SUMMARY

Hi, I'm Quang, 2000, a front-end developer with two years of experience, familiar with reactjs and its ecosystem, able to work as a full stack developer with nodejs, experienced working in e-commerce, insurance and health-tech field. This time, I'm looking for a job where I can open my skill more in both front-end and back-end.

## SKILLS

Familiar with some front-end likes: reactjs, nextjs, mui, redux-toolkit, tailwindcss, ...
some knowledge in back-end: mongodb, nodejs, express, sql.
and some other tools: git, figma, notion, linux, vscode, ...

## WORK EXPERIENCES

**free!**

April 2023 - Present

I'm currently having a break between jobs, taking time to read some books, and self-taught some more skills about micro front-end, express, database, ci/cd, and deployment.

**Buymed | Thuocsi.vn**

---

## INTERESTING

Currently I'm having some interesting in research more front-end technologies, animations and web apis, reading some books and novels, playing some games, every day practicing calisthenic and meditation.

Thank you very much for taking your time on my resume.
Have a nice day!
